Cynap PRO
Quick Start Guide

vSolution Cynap PRO by WolfVision

Introduction

Cynap PRO by WolfVision® delivers an all-in-one collaboration and presentation solution, featuring BYOD, streaming to vSolution Cynap systems, web conferencing, and a document and media player, with support for up to 4K UHD resolution.

Hardware Connection

Make all necessary connections according to the following illustration.

Plug in the power cord as the last step.

Power on the equipment.

Typical Setup

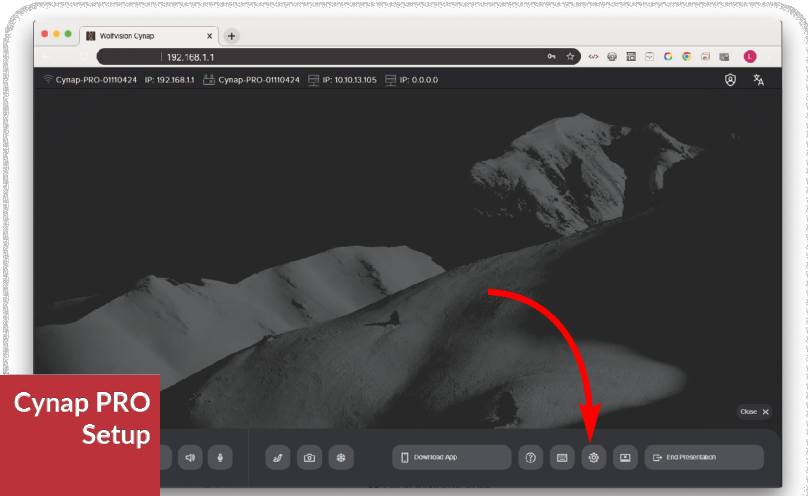

Connect and Control

Operating for the first time

When the Cynap system is switched on, all settings can be configured in the password-protected settings section of the graphical user interface (GUI). Access the GUI by using a web browser on your connected PC or tablet (input the IP address), by using the optional remote control, or by using a connected USB mouse and keyboard.

Push the  button on the right-hand edge to open the Control center and click on the cogwheel.

Initial default admin password: **Password**

Initial SSID of built-in Access Point: **model name + serial number of the unit**

Initial default password of built-in Access Point: **serial number of the unit (8 digits)**

Check the integrated Help Guide for further details.
